## SailMaster Ultimate

Based on the proven shaft motor series 'DriveMaster Ultimate Liquid Cooled' electric drive systems Bell Marine is introducing a full range of Saildrives.

With outputs from 2.5 to 35 kW and battery voltages ranging from 24v to 144v depending on the desired power rating required.

High output torque available at lower prop speeds from the first second means that larger propellers can be used that increase the efficiency of the system!

Type:	V	kW	rpm
Sailmaster 2.5 <i>Eco-Line - Air Cooled</i>	24	3.0	700
Sailmaster 4.0 <i>Eco-Line - Air Cooled</i>	48	4.0	700
Sailmaster Ultimate 5.0 <i>Liquid-cooled</i>	48	5.0	700
Sailmaster Ultimate 10 <i>Liquid-cooled</i>	48	10.0	700
Sailmaster Ultimate 15 <i>Liquid-cooled</i>	48	15.0	1000
SailMaster Ultimate 20 <i>Liquid-cooled</i>	96	20.0	1000
Sailmaster Ultimate 25 <i>Liquid-cooled</i>	144	30.0	1000
Sailmaster Ultimate 35 <i>Liquid-cooled</i>	144	35.0	1250

Saildrives have several advantages:

- Compact and relatively quick to install.
- No engine box so a large open cockpit.
- Much less vulnerable than under water Pods
- Easily accessible for maintenance
- Reliable technology
